EDUCATION

University of Engineering and Technology, Taxila (UET, Taxila) Taxila (Sep 2022 – June 2026)
Bachelor of Computer Science

Divisional Public School & Inter College Sahiwal (2020 – 2022)
Intermediate (Pre-Engineering)

PROFESSIONAL EXPERIENCE

PureLogics
Trainee AI Engineer On Site (June 2026 – September 2026)

- Completed an intensive 3-month AI Training Program spanning the full Python-to-AI pipeline: core programming, data preprocessing/EDA, classical ML, and deep learning (CNNs, Transformer architectures), with a focus on model tuning, evaluation, and deployment.
- Built LLM-powered applications with RAG pipelines, prompt engineering, and autonomous AI agents, culminating in a capstone project covering end-to-end AI solution design and deployment.

CodeAlpha
Machine Learning Intern Remote (April 2026)

- Delivered three end-to-end ML projects in a one-month internship: Credit Scoring (Logistic Regression, Decision Trees, Random Forest, Gradient Boosting), Handwritten Character Recognition (CNN on MNIST), and Disease Prediction (SVM, Logistic Regression, Random Forest, Gradient Boosting), using Python, Scikit-learn, TensorFlow, and Keras.
- Independently managed the full ML workflow (data cleaning, feature engineering, training, and evaluation with Precision, Recall, F1-Score and ROC-AUC), applying supervised and deep learning techniques under project deadlines.

PROJECTS

Adaptive Multimodal AI Interview & Candidate Assessment System (Final Year Project, team)

- Built an end-to-end AI-powered recruitment platform that analyzes job descriptions and candidate CVs using LLMs, performing category-specific experience matching and automated eligibility screening.
- Engineered an adaptive real-time voice interview engine (LiveKit Agents, faster-whisper STT, ElevenLabs TTS) that adjusts question difficulty, verifies CV claims through follow-up questions, and generates rubric-based skill assessment reports. Tools: Python, FastAPI, LLMs, LiveKit, PostgreSQL

Credit Scoring Model

- Built a creditworthiness prediction model on a synthetic dataset of 2,000 applicants, engineering features from financial history (income, debt, credit utilization, payment history).
- Compared Logistic Regression, Decision Tree, Random Forest and Gradient Boosting; Logistic Regression performed best (ROC-AUC 0.935, 5-fold CV 0.935 ± 0.012). Tools: Python, Scikit-learn, Pandas, NumPy, Matplotlib

Handwritten Character Recognition

- Developed a CNN to classify handwritten digits on the MNIST dataset, using batch normalization, dropout and learning-rate scheduling.
- Achieved 99.5% test accuracy (~1.7M parameters, per-class F1 0.99–1.00). Tools: Python, TensorFlow, Keras, NumPy, Scikit-learn

Disease Prediction from Medical Data

- Built one reusable pipeline to predict disease likelihood from structured patient data using SVM, Logistic Regression, Random Forest and Gradient Boosting, with feature-importance analysis.
- Evaluated on the real UCI Breast Cancer dataset (98.2% accuracy, ROC-AUC 0.995) plus synthetic Heart Disease and Diabetes data. Tools: Python, Scikit-learn, Pandas, NumPy, Matplotlib

TECHNICAL SKILLS

Machine Learning: Supervised Learning, Unsupervised Learning, Neural Networks, Decision Trees, Random Forest, SVM, Gradient Boosting, Reinforcement Learning, Recommender Systems
Deep Learning: CNN, RNN, LSTM, Transformers, TensorFlow, Keras
Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, AI Agents
Languages & Libraries: Python, Scikit-learn, TensorFlow, Keras, NumPy, Pandas, Matplotlib
Backend Development: FastAPI, REST APIs, PostgreSQL
Tools: Jupyter Notebook, VS Code, Git, GitHub

CERTIFICATIONS

Machine Learning Specialization | DeepLearning.AI & Stanford University (Coursera)
Deep Learning Specialization | DeepLearning.AI (Coursera)

LEADERSHIP ACTIVITIES

- **Rashid Cheema Health & Blood Donors' Society (RCHBDS), UET Taxila** · ***Logistics Head*** (2025 – 2026)
- **Uetian Youth Society, UET Taxila** · ***Finance Head*** (2024 – 2026)
